

Gantry shown with double glass and overhead heating option

Designed for the Drop-in range, these gantries are available as one or two sided glass units to protect food, and can be equipped with heating elements (for hot units) or lighting (for cold units). European build quality and styling, with round tubular uprights for the most demanding of installations.

Ideal for protecting food in either hot or cold drop-in units, these gantries are available in 5 models, with lengths to suit the 800, 1125, 1455, 1780 and 2090mm drop-ins.
