

## SAN JAMAR EZI-FIT<sup>®</sup> CUP DISPENSER L2400CFSM AND L2200CFSM

The EZI-FIT solution from San Jamar for all your cup dispensing needs.

Whatever the size; whatever the type – foam, paper or plastic; whatever the mounting need – horizontal or vertical, the EZI-Fit<sup>®</sup> cup dispensing solution is the answer.

Simple to instal and operate, the EZI-FIT Dispenser comes with four different size gaskets to cover the cup size range from 73-121mm diameter cups.

Easily change to other cup sizes without tools.

Ideal for multiple installations using different size cups in the same dispenser for uniform appearance.

The EZI-to-change patented gaskets hold and seal the cups avoiding contamination.

The quick release collar provides easy cleaning, and the no-jam cup holder and tangle-free spring protect cups.

Also choose EZI-FIT Lid Dispensers (L2200CFSM or L2400CFSM pictured) to complement the installation and provide maximum convenience for your clients and minimise waste.

EZI-FIT Cup Dispensers are available in the regular tube length of 597mm, or the shorter C2410C18 Model at 450mm length for confined cabinet spaces.

Replacement gaskets are readily available.

For applications where in-counter mounting is not possible, choose the surface-mount model **C2410SM** with sturdy 6 gauge plated wire frame for horizontal or vertical mount.

Now, let's put a lid on it
