

TQ-405 & TQ-805 TOAST QWICK HIGH PRODUCTION CONVEYOR TOASTERS

Hatco TQ Series High Wattage Toasters are the answer for busy high volume venues where rapid consistent toast output is required.

Hatco's patented Colourgard Sensing System automatically adjusts conveyor speed to maintain consistent toast colour regardless of how many slices are being produced. No more wastage trying to guess the correct setting.

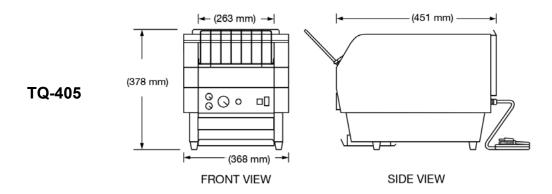

With electronic controls for top and bottom sheathed heating elements, quality is assured. TQ Series Toasters also offer front or rear chute delivery for real versatility. These models suit high-load requirements and come with insulated, fan assisted interiors for cool surface temperatures making them safe in any environment.

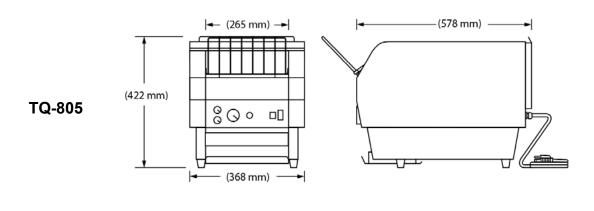

The TQ-405 model is suitable for up to 300 toasted slices per hour, whilst the powerhouse TQ-805 model handles up to 600 toasted slices per hour.

Both models come with power-save mode to conserve energy and these units easily cope with high moisture content bread products.

All Hatco Toast Qwick models are the result of years of experience manufacturing high output, quality products for the food industry, and come with our exclusive 13 month on-site parts and labour warranty.
