NEW ICARUS ELECTRIC CHARGRILLS BY ZESTI

BENEFITS & PROS OF ICARUS ELECTRIC POWER

The Icarus Electric CharGrills have been engineered to replicate the intense heat of Woodfired and charcoal cooking. This high temperature, combined with the penetrating heat and true natural flames of the Icarus technology, not only gives the meat an amazing natural flavour but also tenderises meats in a way that traditional gas grills can't match, providing an unmatched grilling experience.

Heat Technology: Proprietary Icarus Heat system reaches over 500°C for authentic chargrilled flavour, and penetrating heat.

Refractory Floor: Unique fat-vaporising system turns drippings into dust, for easy cleanup.

Stainless Steel Resting Rack: second-tier resting/grilling rack or optimal heat control and versatile cooking. Rest cooked or raw produce there to get to temperature.

Temperature Control: Adjustment for precision grilling, with an automatic element shutdown for safety.

Control the Heat with the percentage dial.

Removable Components: Easy-to-clean design with removable grilling racks and garnish rails

Key Benefits:

High Heat Capabilities : These grills can reach surface temperatures of up to 900°C, making them ideal for searing and grilling at high intensities. The heat is penetrating and is an intense heat driving the moisture level deep into the protein encasing the juices with an even char crust. This also allows for a more tender and juicier steak, as well as enhancing the natural taste of the protein.

Cleaner Operation : These grills offer protection against oil and debris due to their vaporising hearth system. Not only does this help to keep the elements clean, but it also minimises the risk of fire hazards, making them safer and easier to maintain in a busy commercial kitchen environment.

ICARUS ELECTRIC BENCHTOP GRILL MODELS

MADE IN WESTERN AUSTRALIA

ICARUS 600PRO SPECIFICATION SHEET

IT'S FAST, CLEAN & GREEN

Icarus 600 PRO Electric Benchtop Chargrill

Model ID : IG600PRO

Proudly Australian made, the Icarus 600 PRO Electric Chargrill mimics hard-fuel cooking performance through advanced Icarus electric heat technology. Designed for commercial kitchens, it generates extreme, penetrating temperatures for superior searing, charring, and fast recovery – without the need for gas or solid fuel. Featuring two Icarus SGR Heating Elements, the 600 PRO is a fully finished, commercial-grade solution built for professional kitchens worldwide.

Description	Information
Power Supply	3Phase 20Amp 415vac 50Hz (Only utilises 2 Phases)
Electrical Power Cord	1M Lead on Power Plug, set with 32A 5p 6h IP44/IP54 SHARK Plug, at rear.
Energy Consumption	8.64 kW (at 100% use of power)
Burners/Cook Zones	2x Internal Icarus SGR Heating Elements
External Dimensions	600mm x 700mm x 780mm
Cook Zone Dimension	434mm x 496mm
Weight Of Chargrill	150kg
Construction	• 304 Grade Stainless Steel Chassis • Cast Iron Enamel Chargrill plates. • Internal Armorax Refractory Hearth. • Fully insulated internals rated to 1260.C

ICARUS 900 SPECIFICATION SHEET

IT'S FAST, CLEAN & GREEN

Icarus 900 Electric Benchtop Chargrill

Model ID : IG900

Proudly Australian made, the Icarus 900 Electric Chargrill mimics hard-fuel cooking performance through advanced Icarus electric heat technology. Designed for commercial kitchens, it generates extreme, penetrating temperatures for superior searing, charring, and fast recovery – without the need for gas or solid fuel. Featuring two Icarus SGR Heating Elements, the 900 is a fully finished, commercial-grade solution built for professional kitchens worldwide.

Description	Information
Power Supply	3Phase 20Amp 415vac 50Hz (Only utilises 2 Phases)
Electrical Power Cord	1M Lead on Power Plug, set with 32A 5p 6h IP44/IP54 SHARK Plug, at rear.
Energy Consumption	8.64 kW (at 100% use of power)
Burners/Cook Zones	2x Internal Icarus SGR Heating Elements
External Dimensions	900mm x 700mm x 780mm
Cook Zone Dimension	734mm x 496mm
Weight Of Chargrill	190kg
Construction	• 304 Grade Stainless Steel Chassis • Cast Iron Enamel Chargrill plates. • Internal Armorax Refractory Hearth. • Fully insulated internals rated to 1260.C

ICARUS 900PRO SPECIFICATION SHEET

IT'S FAST, CLEAN & GREEN

Icarus 900 PRO Electric Benchtop Chargrill

Model ID : IG900PRO

Proudly Australian made, the Icarus 900 PRO Electric Chargrill mimics hard-fuel cooking performance through advanced Icarus electric heat technology. Designed for commercial kitchens, it generates extreme, penetrating temperatures for superior searing, charring, and fast recovery – without the need for gas or solid fuel. Featuring three Icarus SGR Heating Elements, the 900 PRO is a fully finished, commercial-grade solution built for professional kitchens worldwide.

Description	Information
Power Supply	3Phase 20Amp 415vac 50Hz
Electrical Power Cord	1M Lead on Power Plug, set with 32A 5p 6h IP44/IP54 SHARK Plug, at rear.
Energy Consumption	12.96 kW (at 100% use of power)
Burners/Cook Zones	3x Internal Icarus SGR Heating Elements
External Dimensions	900mm x 700mm x 780mm
Cook Zone Dimension	734mm x 496mm
Weight Of Chargrill	190kg
Construction	• 304 Grade Stainless Steel Chassis • Cast Iron Enamel Chargrill plates. • Internal Armorax Refractory Hearth. • Fully insulated internals rated to 1260.C

ICARUS 1200 SPECIFICATION SHEET

IT'S FAST, CLEAN & GREEN

Icarus 1200 Electric Benchtop Chargrill

Model ID : IG1200

Proudly Australian made, the Icarus 1200 Electric Chargrill mimics hard-fuel cooking performance through advanced Icarus electric heat technology. Designed for commercial kitchens, it generates extreme, penetrating temperatures for superior searing, charring, and fast recovery – without the need for gas or solid fuel. Featuring three Icarus SGR Heating Elements, the 1200 is a fully finished, commercial-grade solution built for professional kitchens worldwide.

Description	Information
Power Supply	3Phase 20Amp 415vac 50Hz
Electrical Power Cord	1M Lead on Power Plug, set with 32A 5p 6h IP44/IP54 SHARK Plug, at rear.
Energy Consumption	12.96 kW (at 100% use of power)
Burners/Cook Zones	3x Internal Icarus SGR Heating Elements
External Dimensions	1200mm x 700mm x 780mm
Cook Zone Dimension	1034mm x 496mm
Weight Of Chargrill	220kg
Construction	• 304 Grade Stainless Steel Chassis • Cast Iron Enamel Chargrill plates. • Internal Armorax Refractory Hearth. • Fully insulated internals rated to 1260.C

ICARUS ELECTRIC DROP-IN GRILL MODELS

MADE IN WESTERN AUSTRALIA

ICARUS 600PRO DROP-IN SPECIFICATION SHEET

IT'S FAST, CLEAN & GREEN

Icarus 600 PRO Drop-In Electric Chargrill

Model ID : IG600PRODI

Proudly Australian made, the 600 PRO Drop-In Electric Chargrill delivers true hard-fuel cooking performance through advanced Icarus electric heat technology, in a fully integrated built-in format. Designed to drop seamlessly into custom benchtops, it generates extreme, penetrating temperatures for superior searing, charring, and fast recovery – without gas or solid fuel. Featuring two Icarus SGR Heating Elements and a separate mountable control box, the 600PRO Drop-In is a commercial-grade grill engineered for premium global kitchen projects.

Description	Information
Power Supply	3Phase 20Amp 415vac 50Hz (Only utilises 2 Phases)
Electrical Power Cord	1M Lead on Power Plug, set with 32A 5p 6h IP44/IP54 SHARK Plug, on Control Box.
Energy Consumption	8.64 kW (at 100% use of power)
Burners/Cook Zones	2x Internal Icarus SGR Heating Elements
External Dimensions	600mm x 668mm x 615mm
Cook Zone Dimension	724mm x 496mm
Weight Of Chargrill	150kg
Construction	• 304 Grade Stainless Steel Chassis • Cast Iron Enamel Chargrill plates. • Internal Armorax Refractory Hearth. • Fully insulated internals rated to 1260.C
