

- ✓ VEGETABLE SLICER 1100 W.
- ✓ VOLTAGE 220 - 240 V / SINGLE-PHASED.
- ✓ 1 FIXED SPEED : 320 RPM.
- ✓ STAINLESS STEEL PUSHER HANDLE.
- ✓ DELIVERED WITHOUT DISC.

ADVANTAGES

- French design and manufacture, guaranteed quality, robustness and reparability - The DYNAMIC vegetable slicer is easily disassembled, repairable and reassembled. DYNAMIC guarantees the immediate availability of spare parts.
- Thanks to its unique design, this is an extremely versatile and aesthetic device. The design is based on users' real needs: the use of first quality materials (stainless steel), thought-out ergonomics, details and tips guaranteeing hygiene and safety (patent pending).
- A product designed with sustainable development in mind – 80% of the materials used are made from stainless steel and aluminium.

DESCRIPTION

- Universal vegetable slicer with a large choice of stainless steel discs. All parts in contact with food are easily removable and dishwasher-proof for quick cleaning: cutting chamber, pusher, hopper and pusher handle. Thought-out ergonomics, the device is designed to be used by both left- and right-handed.
- Two hoppers to adapt to all types of vegetables: a wide hopper of 217 cm² for bulky vegetables such as cabbage, celeriac and a cylindrical hopper of Ø 60.5 mm for long and delicate vegetables (zucchinis, cucumbers). A side food chute with a 20 cm passage to install a deep GN collection container (20 cm).
- An induction motor, integrated in the metal motor block, with a power of 1100 W and a single-phased power supply of 220 - 240 V. Easy-to-use control panel.
- Magnetic detection which prevents the appliance from starting if an anomaly is detected. The appliance stops as soon as it detects any type of inappropriate use.
- Optional stainless steel discs, dishwasher-proof.

MAIN CHARACTERISTICS

- Capacity up to 300 kg/h, suitable for as much as 400 covers per service.
- Capable of grating, slicing, cutting fruits and vegetables.
- Ergonomic, ambidextrous, stainless steel pusher handle.
- All parts in contact with food are removable without tools and are dishwasher-proof.
- Very practical side disposal, without projection, enabling the use of deep collection containers.
- Automatic start with pusher-handle.
- Automatic magnetic detection for total operator safety.
- Wide choice of stainless steel discs with a diameter of 225 mm (optional).

1 FIXED SPEED CONTROL PANEL

CONSTRUCTION

- An induction motor, integrated in the motor block, ensuring robustness and reliability over time.
- Integrated air vents on the motor unit for good engine ventilation.
- Extremely solid base.
- POWER : 1100 W.
- VOLTAGE : 220 - 240 V / SINGLE-PHASE.
- 1 FIXED SPEED : 320 Rpm.
- Easy and quick to dismantle accessories without tools (patent pending).
